Bobcat News

6th- Send \$3 for Movie and Snacks
11th- Veterans Day (No Program)

Upcoming Events

25th-27th- Thanksgiving Holidays

Hello Parents,

As you know, due to COVID, we can not have a Veterans Day Program. This year, to help us honor our veterans, we are asking you to participate by asking a veteran to record a short video saying their name, what branch they are in, and where they served. They could also include a short summary of what it was like to serve in our military. Please send the videos before November 9th to me via email at tkjordan@spart7.org or via text at 864-504-8935. We will show the videos to our students each day. Thank you in advance for participating in our veteran day activities.

Why Is Science Important?

Problem-solving and critical thinking are two of the most important skills students learn in school. Science is one of the most important subjects students study, because it gives them the critical thinking skills they need in every subject. Science is not just a collection of facts.

Of course, facts are an important part of science: But science is much, much more.

Science involves:

- ★ Observing what's happening;
- ★ Classifying or organizing information;
- ★ Predicting what will happen;
- ★ Testing predictions under controlled conditions to see if they are correct; and
- ★ Drawing conclusions.

Here is something you can work on at home with your child:

- 1-What happens to breakfast cereal when we pour milk on it?
- 2- What happens over time when a plant isn't watered or exposed to proper sunlight?
