

Worked Based Learning (WBL)

WBL provides students with real-life work experiences where they apply academic and technical skills to develop employability skills.

School curriculum is integrated with the workplace to create a uniquely individualized experience.

WBL students have the option to work in house in one the school-based businesses (Vikings Unlimited or Viking Printing), on campus in their IGP related area, or off campus in a position directly related to their future plans. Complete a CTE major and gain real world work experience while in high school!
