Policy ADF District Wellness

Issued 5/18

Purpose: To establish the basic structure for the promotion of wellness in all schools in Spartanburg School District Seven.

Spartanburg School District Seven recognizes that student wellness and proper nutrition are related to students’ physical well-being, growth, development, and readiness to learn. Spartanburg School District Seven is committed to providing a school environment that promotes student wellness, proper nutrition, nutrition education, and regular and physical activity as part of the total learning experience. In a healthy school environment, students will learn about and participate in positive dietary and lifestyle practices.

Therefore, it is the policy of the board to ensure the following:

Food and Beverage Availability

Nutrition Education

Spartanburg School District Seven is committed to serving healthy meals to students, with plenty of fruits, vegetables, whole grains, and fat-free and low-fat milk that are moderate in sodium, low in saturated fat, and zero grams trans fat per serving (nutritional label or manufacturer’s specification). District Seven is also committed to meeting the nutritional needs of school children within their calorie requirements. The District Seven meal program aims to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns, and support healthy choices while accommodating cultural food preferences and special dietary needs. All schools within District Seven participate in the USDA child nutrition program through the National School Lunch Program (NLSP) and the School Breakfast Program (SBP) and are committed to offering school meals that:

- are accessible to all students
- are appealing and attractive to children
- are served in clean and pleasant settings
- meet or exceed current nutrition requirements established by local, state, and federal statutes and regulations
- promote healthy food and beverage choices using Smarter Lunchroom techniques as recommended by the USDA where appropriate (source: USDA School Meals Regulations, USDA Food and Nutrition All Foods Flyer, Smart Snacks Product Calculator)

Students in grades Pre-K through fifth grades will be provided a minimum of 20 minutes to consume lunch after they have received their food. Schools will not use foods or beverages as rewards for academic performance or good behavior. Additionally, schools will not withhold food or beverages as punishment. Teachers are provided with a list of alternative ideas for behavior management.

Water

To promote hydration, free, safe, unflavored drinking water will be available to ALL students throughout the school day and throughout every school campus. District Seven will make drinking water available where school meals are served during ALL mealtimes.

Competitive Foods and Beverages

Nutritional standards for competitive foods

District Seven is committed to ensuring that all foods and beverages available to students on school campuses during the school day support healthy eating. The foods and beverages sold outside of the school meal programs (i.e., competitive foods and beverages) which includes vending machines, a la carte foods, beverage contacts, concession stands, school stores, classroom parties, and celebrations will meet the USDA Smart Snacks in School nutrition standards, at a minimum (USDA Food and Nutrition All Food Flyer). Spartanburg District Seven will establish standards for foods made available, but not sold, during the school day on school campuses.

All foods that meet the competitive food standards may be sold at fundraisers on the school campuses during school hours. The number of fundraisers exempt from the nutrition requirements will be determined by the State Board of Education. (SC Department of Education Smart Snacks and Exempt Fundraisers)

Goals for Health and Wellness

Nutrition promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages and by creating food environments that encourage healthy nutrition choice and by encouraging participation.
in school meal programs. Students and staff will receive consistent nutrition messages throughout schools, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents/legal guardians, students, and the community.

Spartanburg School District Seven will promote healthy food and beverage choices for all throughout the school campus and will encourage participation in school meal programs. This promotion will occur through the use of evidence-based healthy food promotions such as Smarter Lunchroom techniques and through adherence to a policy of 100 percent if foods and beverages meeting the USDA Smart Snacks in School nutrition standards. (SC Legislature PE Standards, SC Code of Laws Comprehensive Health Education Program)

**Nutrition Education**

Spartanburg School District Seven will teach, model, encourage, and support healthy eating by all students. Schools will provide nutrition education and engage in nutrition promotion that fulfills the following criteria:

- fosters the adoption and maintenance of healthy eating behaviors such as acquiring skills for reading food labels and menu planning
- follow the sequential comprehensive standards-based health education program designed to provide students with the knowledge and skills necessary to promote and protect their health
- promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products, and healthy food preparation methods
- emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise)
- links with school meal programs, cafeteria nutrition promotion activities, school gardens, Farm to School programs, and other school food and nutrition-related community services (Spartanburg 7 School Menus, Farm to School Network)

**Physical Activity**

Students in Spartanburg School District Seven should participate in at least 60 minutes of physical activity every day. A substantial percentage of students’ physical activity can be provided through a comprehensive school physical activity before, during, and after school; staff involvement; and family and community engagement. Schools may promote opportunities for physical activity via in-school announcements, newsletters, posters, etc. District Seven is committed to providing these opportunities, and schools will ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education.

District Seven encourages the use of physical activity as a reward when feasible. Physical activity during the school day (including, but not limited to, recess, classroom physical activity breaks, or physical education) will not be withheld as punishment for any reason. **This does not include participation on sports teams or with other sports-related after school activities, nor does it include participation on sports teams with specific academic requirements.**

**Physical Education**

District Seven will provide students with physical education using an age-appropriate, sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits and incorporate essential health education concepts. The curriculum will support the essential components of physical education.

201 Seven policy and legislative update *(Note: See policy IHAE (Physical Education) for more information on physical education.)*

All students will be provided equal opportunities to participate in physical education classes. The district will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary. (SC Department of Education PE Learning Standards, SC Department of Education Academic Learning Standards)

District Seven will integrate wellness activities into school events, field trips, dances, and assemblies; other food and beverage venues; and physical activity facilities. All school-sponsored events will adhere to the wellness policy guidelines. All school-sponsored wellness events will include physical activity and healthy eating opportunities when appropriate. District Seven will coordinate and integrate other initiatives related to physical activity, physical education, nutrition, and other wellness components so all efforts are complementary and work towards the same set of goals and objectives promoting student well-being, optimal development, and strong educational outcomes. Schools in the district will coordinate content across curricular areas that promote student health, such as teaching nutrition concepts in mathematics, with consultation provided by either the school or the district’s curriculum specialists.

All efforts related to obtaining federal, state, or association recognition for efforts or grants/funding opportunities for healthy school environments will be coordinated with and complementary of the wellness policy including, but not limited to, ensuring the involvement of the district wellness committee.
Community Health Promotion and Family Engagement

District Seven will promote to parents/legal guardians, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. Families will be informed and invited to participate in school-sponsored activities and will receive information about health promotion efforts. District Seven will use electronic mechanisms (e.g., email or district website notices), as well as non-electronic mechanisms, (e.g., newsletters, presentations to parents/legal guardians, or sending information home to parents/legal guardians), to ensure that all families are actively notified of opportunities to participate in school-sponsored activities and receive information about health promotion efforts.

Coordinated School Health Advisory Council

Wellness committee

Spartanburg District Seven will convene a wellness committee or Coordinated School Health Advisory Committee (SCHAC) that meets on a regular basis during the school year to establish district wellness goals and to oversee school health and safety policies and programs including development, implementation, and periodic review and update of the wellness policy. Wellness committee members will include, to the extent possible, parents/legal guardians, students, representatives of the district, nutrition services, physical education teachers, school health professionals, the school board, school administrators, and the general public. The assistant superintendent for student services will be the designated officer for ensuring district compliance with the wellness policy and oversight of the committee.

Annually, District Seven will notify the public about the content and implementation of the wellness policy and share any updates to the policy.

Every three years, District Seven will assess its compliance with the policy, how it compares to model wellness policies published by state and federal agencies, and the district’s progress in attaining the goals of the policy. The results of this assessment will be made available to the public to showcase the wellness efforts being made by the district and how each school is in compliance with the wellness policy. Following this assessment, the district will update or modify the policy as necessary and share these changes with the public. (USDA Food and Nutrition Service School Wellness Policy and USDA Local School Wellness Policy Implementation)

Recordkeeping

District Seven will retain records to document compliance with the requirements of the wellness policy. Documentation maintained by the district will include, but will not be limited to, the following:

- the written wellness policy
- documentation demonstrating that the policy has been made available to the public
- documentation of efforts to review and update the policy, including an indication of who is involved in the update and methods the district uses to inform stakeholders of their ability to participate on the district wellness committee
- documentation to demonstrate compliance with the annual public notification requirements
- the most recent assessment on the implementation of the wellness policy
- documentation demonstrating the most recent assessment on the implementation of the wellness policy has been made available to the public

Food and Beverage Marketing

District Seven is committed to providing a school environment that ensures opportunity for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. The district strives to teach students how to make informed choices about nutrition, health, and physical activity. These efforts will be weakened if students are subjected to advertising on district property that contains messages inconsistent with the health information the district is imparting through nutrition education and health promotion efforts. It is the intent of District Seven to protect and promote students’ health by permitting advertising and marketing for only those foods and beverages that are permitted to be sold on the school campus, consistent with the district’s wellness policy.

Any foods and beverages marketed or promoted to students on school campuses during the school day will meet or exceed the USDA Smart Snacks in School nutrition standards such that only those foods that comply with or exceed those nutrition standards are permitted to be marketed or promoted to students (Smart Snacks Product Calculator). These standards do not apply to marketing that occurs at events outside of school hours, such as after school sporting events or any other events, including school fundraisers.

( SC Department of Education Smart Snacks and Exempt Fundraisers) Contracts for goods or services that include a food and beverage marketing component executed after June 30, 2017, must conform to federal nutrition standards. No exceptions will be granted.

Food and beverage marketing is defined as advertising and other promotions in schools. Food and beverage includes any oral, ADF
written, or graphic statements made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller, or any other entity with a commercial interest in the product. This term includes, but is not limited to the following:

- brand names, trademarks, logos, or tags, except when placed on a physically present food or beverage product or its container
- displays, such as on vending machine exteriors
- corporate brand, logo, name, or trademark on school equipment that is displayed during the school day, such as marquees, message boards, scoreboards, or backboards (Note: Immediate replacement of these items is not required; however, the district will replace or update scoreboards or other durable equipment when existing contracts are up for renewal or to the extent that is financially possible over time so that items are in compliance with this policy.)

Adopted 6/13/06; Revised 5/6/14, 5/1/18
